Green Check GPS No Certificate	\$130
Custom GPS Training (1 person)	\$40/hr.
Custom GPS Training (2 people)	\$60/hr.
Custom GPS Training (3 or more)	\$100/hr.

## TECH SUPPORT PRICES

99.9% of all GPS connect to a computer and to the internet in some way. Whether it is firmware or map updates, Gil's Geo Services can either demonstrate how it's done, or, do it for you.

### GPS Technical Support

Custom maps to Points of Interest (POIs) can be downloaded into most GPS units. Gil can assist you in obtaining and installing these maps. Gil's Geo Services can also assist with other features of Automotive GPS (Bluetooth, traffic, picture viewers) which are useful and even provide safety.

**GPS Technical Support**                      **\$40/hr.**

### GPS Map Updates

Updating maps on your Automotive GPS can be troublesome; it's even impossible if you don't have access to a computer connected to the internet. Gil's can eliminate all the time and trouble it takes.

**GPS Map Update**                                      **\$50**

\*Update purchased separately, not included.  
\*Requires the GPS unit to be registered.

Gil Grandahl, the Pathfinder & Navigator of Gil's Geo Services, has over 15 years of experience with GPS and the technology.

Gil is also an accomplished adult educator having instructed courses from First Aid to Fire Fighting in several industries.

Gil's Geo Services is a Member Organization of the Calgary Area Outdoor Council (CAOC) which is a non-profit organization that represents individuals and member groups that are involved in outdoor recreation and environmental activities.

## GPS TRAINING & TECH SUPPORT

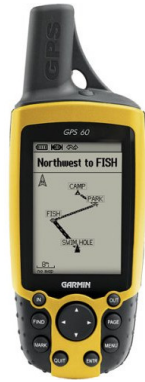

GPS equipment has become extremely popular. However, most people have difficulty using a GPS directly out of the box. Gil's Geo Services offer several levels of GPS Training and Technical Support.

Gil's knowledge and experience goes far beyond any owner's manual and tips and tricks you will see on any video. If you are purchasing your first GPS or have owned one for years, Gil's Geo Services can help bring the satellite technology "down-to-earth" for you.

## Handheld GPS Training Course

This 3-hour course covers the basics of using GPS outdoors. You'll learn how the GPS system works and some of the terminology commonly used.

Each participant will experience adjusting the settings and going through the set up of a standard handheld GPS which is supplied by the course instructor.

After the theory component, we head outdoors to use the GPS to find a spot (Waypoint), create a breadcrumb or popcorn trail (Track), and plan a journey (Route).

The Handheld course is ideal for Geocachers. Geocaching is a high-tech treasure hunting game that uses GPS to find hidden containers. With over 1 million caches around the world, this is the perfect environmentally-friendly way to use your GPS to discover new places.

This course is generally held at the Calgary Area Outdoor Council which is centrally-located and has free parking available.

## Green Check GPS Certification Program

The National GPS Certification Program specializes in GPS and GIS training. It is the first program to promote widely-recognized standards and conventions for GPS certification. This training shows the relationship between the map, compass and the GPS unit (all supplied for course). For much more information -including videos- about the Green Check Program visit their website.

This training course is ideal for;

- Outdoor Enthusiasts
- Fishermen and Women
- Trappers/Hunters
- Guides/Outfitters
- Police/Fire/Ambulance Personnel
- Pipeline and Hydro Field Workers
- Search and Rescue Personnel
- Forestry and Forest Industry Workers
- Well Contractors and Technicians

Green Check training is instructed to Search and Rescue teams like Calgary's and is also delivered to several Police, Fire, Ambulance and other emergency officials across Canada.

Certification (recognized nationally) is available upon completion of the 8 hours of training and an open-book exam. The test and certificate are optional (for a small additional fee) but are not a requirement for this training.

## Custom GPS Training

If classroom and generic GPS information is not for you, this option allows you to learn what you want and is totally customizable to meet your needs. If you'd like to learn using your own GPS and with scenarios that are relevant to you, Gil's Custom GPS Training service may be the most effective and cost-efficient way to learn more about your GPS.

No matter the class size, from a one-on-one session to a presentation before a club or association, Gil's Geo Services is your best source for GPS knowledge and know-how.

Gil's offers convenience and is available during the day, evenings and on weekends.

Gil's Geo Services is also considerate of our environment and uses Calgary Transit or Calgary's Bike Paths whenever possible.
